

NUMEDIC

superior dairy technology

Solution providers...

Numedic has been providing professional services to Dairy Farmers for over 25 years. This extends from the initial concept and design engineering, workshop manufacture and quality control, through to supplying the farmer with the best available products.

Innovators...

Numedic's on-going focus is to provide solutions to clients' needs. This requires a commitment to development and the ability to adopt new innovative technology to meet these needs.

Consultancy and engineering services...

Numedic offers a design and consultancy service for Dairy Farmers based on many years of experience and understanding of the practical day to day requirements of the industry. Numedic can also provide on-going engineering services in their industrial workshop, centrally located in Rotorua, New Zealand.

Knowledgable personnel...

Directors/owners, Peter and Cathryn Reid, have 20 years personal experience in the Dairy Farming industry - an invaluable advantage when it comes to understanding customer's needs and providing total customer satisfaction.

A Dairy Farmer himself for 20 years, Peter Reid understands the industry and the requirement for reliable, durable and effective equipment.

Cathryn Reid utilises her dairy farming knowlegde to provide technical advice and excellent customer service

“
