Accuracy & ease Best in the cowshed

Drenching Dairy Cows with a Numedic System ensures the cows will receive their required minerals to maximise production

Packed with Features and designed to last

- No daily or weekly flushing, just hang up your guns and go home
- The purpose built drench pump is manufactured from high quality stainless steel and nylon. It handles corrosive substances such as copper sulphate and salt easily
- Superior pump agitation and specially designed tank are ideal for cheaper, palatable zinc and magnesium oxides that need to remain in suspension
- Easy squeeze guns that prevent tired hands
- Hose manufactured to Numedic Specifications to eliminate flattening, wearing and kinking
- Timer and Filter supplied with all systems to eliminate settling and blockages
- Simple to install
- No complicated electronics
- NZ National Fieldays[®] Prototype award

Metered Drench System

- **Accurate**
This system consistently delivers a 120ml dose every time
- **Quick**
The system is fast and delivers a "supercharged" shot to the cow.
- **Security**
The Numedic metered drench system emits an audible sound so you know when the cow has been drenched.
- **No Frothing**
Bloat oil has its own separate container. This ensures that the bloat oil will not froth or foam and will stay fresh & be effective.

Unmetered Drench System

- **Simple**
Open the gun and count out your dose...one, two or three etc
- **Cost Effective**
Economically priced to suit any budget
- **Upgrade**
The unmetered system can easily be upgraded to our metered drench system.

■ Supplied to you complete

All Numedic Drench Systems come complete with tanks, cabinets, brackets, guns, hoses, hose, clips, timer, filter etc to install in your cowshed.

■ "Drenching is Best"

Drenching with insoluble powders is cheaper, cows prefer the taste and without a doubt it is one of the best insurance schemes that money can buy.

Teat Spray System

- **Simple**
The 50 litre pressurized container provides a fine controllable mist at the nozzle.
- **Durable**
Plastic non corrosive container, no "O" rings, seals or impeller to corrode and is ideal for iodine based teat sprays.
- **Affordable**
The Numedic teat spray system is extremely cost effective.
